Company Overview

AI adoption with clear accountability, documented controls, and a workforce prepared to use it.

Vantage Advisory Group is a New Jersey AI consulting and advisory firm for government agencies and private organizations nationwide. We deliver AI workforce training, governance, strategy, and agent configuration as fixed-scope engagements with defined deliverables, led by a certified Project Management Professional from assessment through handover.

Core Competencies

01 **AI Literacy and Workforce Training.** Role-based workshops for executives, managers, and staff, from foundational literacy to applied use in daily operations.

02 **AI Governance.** AI use policies, acceptable-use standards, risk and impact assessments, and oversight structures that keep AI adoption accountable.

03 **AI Readiness and Strategy.** Assessment of processes, data, and staff capability, with a prioritized adoption roadmap defining milestones, owners, and budget.

04 **AI Agent Configuration.** Design, configuration, testing, and handover of AI agents and automated workflows on established commercial platforms.

05 **Program and Project Management Support.** PMP-led planning, governance, risk management, and delivery oversight for AI and technology initiatives.

Differentiators

Training measured by what staff do next. Workshops are built on the agency's own work and close with a 30-day adoption check.

Platform-neutral. Tools are selected after requirements are documented, independent of any AI vendor.

PMP delivery discipline. Defined scope, milestones, and status reporting on every engagement.

Governance before deployment. Policy, risk, and accountability are defined before any tool goes live.

Build, train, transfer. The agency owns every system and document; staff are trained to operate them.

Agency information protected. Never used for model training; deleted on written request.

Past Performance

Custom AI Lead-Generation Agent COMPLETED AUGUST 2026

Client: New Jersey architecture firm (private sector). NAICS 541512

Designed, configured, tested, and delivered a custom AI agent that identifies medical-facility project leads within the client's regional market. Completed three test cycles before handover and delivered operating instructions, a quick-start guide, and a guided walkthrough.

Fixed-Price Project Delivery, Prior Firm KEY PERSONNEL, 2015 TO 2022

Founded and led a private-sector firm; managed multiple fixed-price commercial, medical, and residential projects valued up to $5 million, delivered to defined scope and budget.
